DRESSUP

Wall Solution
Design by **García Cumini**

- **INSPIRATIONS**

  Visual lightness and technology are the inspiring principles that promoted an inversion of the traditional storage paradigm, resulting in units that are developed vertically and preserve a perception of great lightness and freedom. That's what inspired Dressup: this system can be easily customised and used in endless ways: on the kitchen splashback, in the bathroom and in the hall.

- **DESCRIPTION**

  A modular wall system made up of elements that are only 22 cm deep and feature sophisticated solutions such as anodised aluminium profiles that support the glass shelves and accessory holders. They can be with or without doors. The profiles are provided with grooves to accommodate lighting and sound diffusion cables. Numerous finishes and combinations are possible with other Cesar models.

● **GENERAL RULES**

01_The carcass is composed of anodised aluminium "millerighe" profiles made using Cesar's L-shaped section. They are available in Nero, Champagne and Bronzo finishes. The back panel is customisable in the Cesar finishes ranging from melamine to lacquer and from stainless steel to natural stone.
02_Fumè and Bronzo finish, 10-mm thick glass shelf matching the width of the carcass. Each module will be supplied with a standard number of shelves. Each shelf will be fitted at a 12 cm distance from the other. For 150 and 180 cm lengths, the shelves will be propped up at the centre using a glass support to prevent bending.
03_Doors are composed of an extruded aluminium frame with fronts available in the many Cesar finishes.
04_ The upper side of the Dressup frame can be covered with an upper top in the Cesar finishes.
05_If Led lights are fitted, please plan for a suitable quantity of electric sockets depending on the project (see price list).
06_ The accessories, glass shelves, top panel and sound system are optional
07_If accessories are fitted in the lower section of Dressup, the minimum distance from the top must be greater or equal to 50 cm.
08_If there are no accessories we recommend leaving a minimum gap of 5 cm from the top of base units.
09_If the unit is installed near the ceiling it is advisable to leave and empty space of at least 12 cm to make adjustments from above it possible.
10_The Dressup project does not include non-standard modules.

CESAR

DRESSUP LINE

Wall Solution
Design by **García Cumini**

● **INSPIRATIONS**

Making the most of the gap between base and wall units in a way that takes up the least possible space in depth. The DressUp Line has been created to reach this goal. It's a sleek and linear shelving system for splashbacks that combines functionality with aesthetic minimalism.

● **DESCRIPTION**

An element belonging to the DressUp system that stands out for its linear lines and consists of a shelf and a back panel connected by technological elements.
This is a comprehensive system designed to accommodate all the kitchen accessories used every day in such a way as to take up the least possible space and volume.

CESAR

DRESSUP LINE

Wall Solution
Design by **García Cumini**

● **DIMENSIONS AND GENERAL CHARACTERISTICS**

Dressup Line

DressUp Line with shelf overlay (optional)

|		
A	Led lighting	
B	DressUp Line edge	
C	Hook/accessory holder	
D	Back panel	
E	Back panel supporting panel (where necessary)	
F	Shelf overlay (optional)	

● **NOTES**

01_The DressUp Line module is composed of an anodised aluminium "millerighe" shelf available in Nero, Champagne and Bronzo finishes and of a back panel. The module is attached to the wall by means of a fastening system created by Cesar. The shelf and the back panel cannot be supplied separately.

02_The 22-mm thick back panel can be customised in the various finishes available in Cesar's palette. The shelf can be supplied with a shelf overlay but only in the natural stone and engineered stone finishes.

03_ DressUp Line's length (L*) can vary from a minimum of 60 cm to a maximum of 3.9 metres.

04_For back panels and shelf overlays in natural stone, engineered stone, Inalco ceramics and Dekton, please check for dimensional restrictions of materials.

06_The height (H*) of the back panel can vary depending on the height restrictions of the material used.

07_If accessories are hung from the shelf, the minimum distance between them and the top must be greater or equal to 50 cm.

08_Led lighting is available for both sides of the shelf or just for one
